Microsoft ADC Cybersecurity Skilling Program

WEEK ONE ASSIGNMENT

Student Name: Ashley Wenwa

INTRODUCTION

This week I worked on a lab that explores the capabilities of Microsoft Identity and Access Management Solutions**.** The modules in the labs I worked on were as follows:

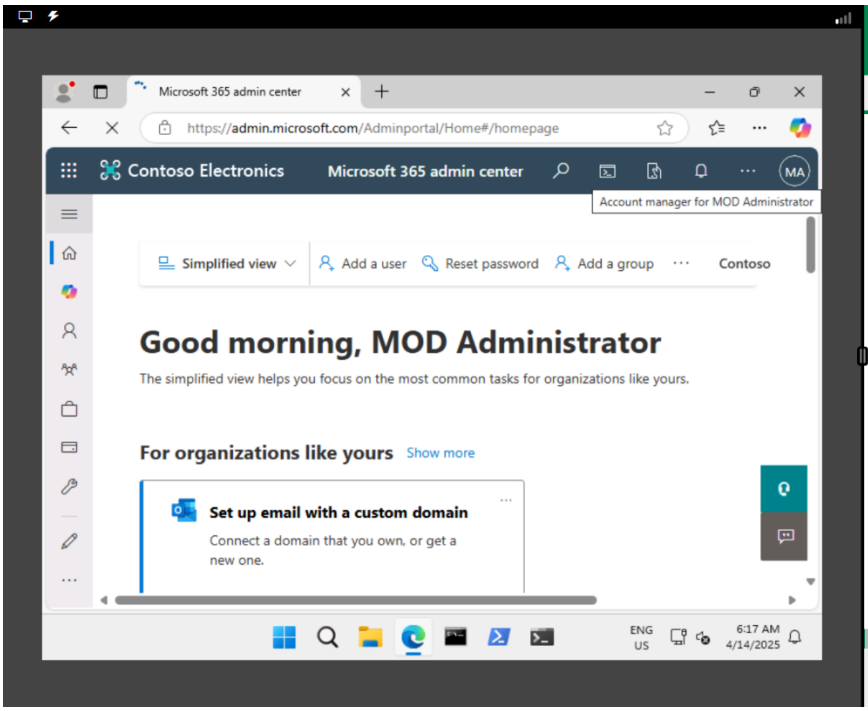
- Explore Microsoft Entra ID User Settings.
- Microsoft Entra self-service password reset.
- Microsoft Entra Conditional Access.
- Explore Privileged Identity Management.

TASKS COMPLETED

1. **EXPLORE MICROSOFT ENTRA ID USER SETTINGS.**

I got to enable the audit log and the monitoring capabilities in Microsoft 365. I then proceeded to create a user “Sara Perez” whose profile I subsequently used to work on module two of the labs.

Here are some screenshots to better explain my process:



Describe the capabilities of Microsoft Identity and A...

Setup - Enable Microsoft 365 audit log and file monitoring

In this setup task, you will enable the Audit log and file monitoring capabilities in Microsoft 365.

- [ ] 1. Open Microsoft Edge. In the address bar, enter `https://admin.microsoft.com`.
- [ ] 2. Sign in with the admin credentials for the Microsoft 365 tenant provided by your authorized lab hoster (ALH).
- [ ] 3. From the left navigation pane of the Microsoft 365 admin center, select **Show all**.
- [ ] 4. Under Admin centers, select **Security**. A new browser page opens to the welcome page of Microsoft Defender.
- [ ] 5. In the left navigation panel, scroll down and expand **System**. From the expanded list, select **Audit**. Note: the audit functionality is also accessible through the Microsoft Purview portal.
- [ ] 6. Once you land on the Audit page, wait 1-2 minutes. If Auditing is NOT enabled, you'll see a blue bar on the top of the page that says start recording user and admin activity. Select **Start**

`UnifiedAuditLogIngestionEnabled`. If audit is enabled, the property UnifiedAuditLogIngestionEnabled will show a value of true.

- [ ] 7. From the left navigation panel, under System, select **Settings**.
- [ ] 8. From the settings page, select **Cloud apps**. Scroll down, then under **Information Protection** select **Files**.
- [ ] 9. If not already enabled, select the box next to where it says **Enable file monitoring** then select **Save**.
- [ ] 10. This concludes the lab setup on the Microsoft 365 tenant.

Review

In this setup, you enabled the audit log and file monitoring capabilities in Microsoft 365.

Congratulations!

You have successfully completed this Lab. Click **Next** to advance to the next **Lab**.

7. From the left navigation panel, select Home to return the home page for the Microsoft Entra admin center.
8. Keep the browser page open, as you'll need it in the subsequent task.
Task 2
In this task you, as the admin, will assign Diego a Microsoft Entra ID role in Privileged Identity Management.
1. Open the browser tab for the home page of the Microsoft Entra admin center.
2. From the left navigation panel, under "Identity", expand Identity Governance, then select Privileged Identity Management.
3. You are now in the Privileged Identity Management quick start page. Review the information on the Get started page. In the main window, under where it says Manage access, select Manage.
4. You're now in the Contoso Roles page. In the search bar, on the top of the page, enter user. From the search results, select User

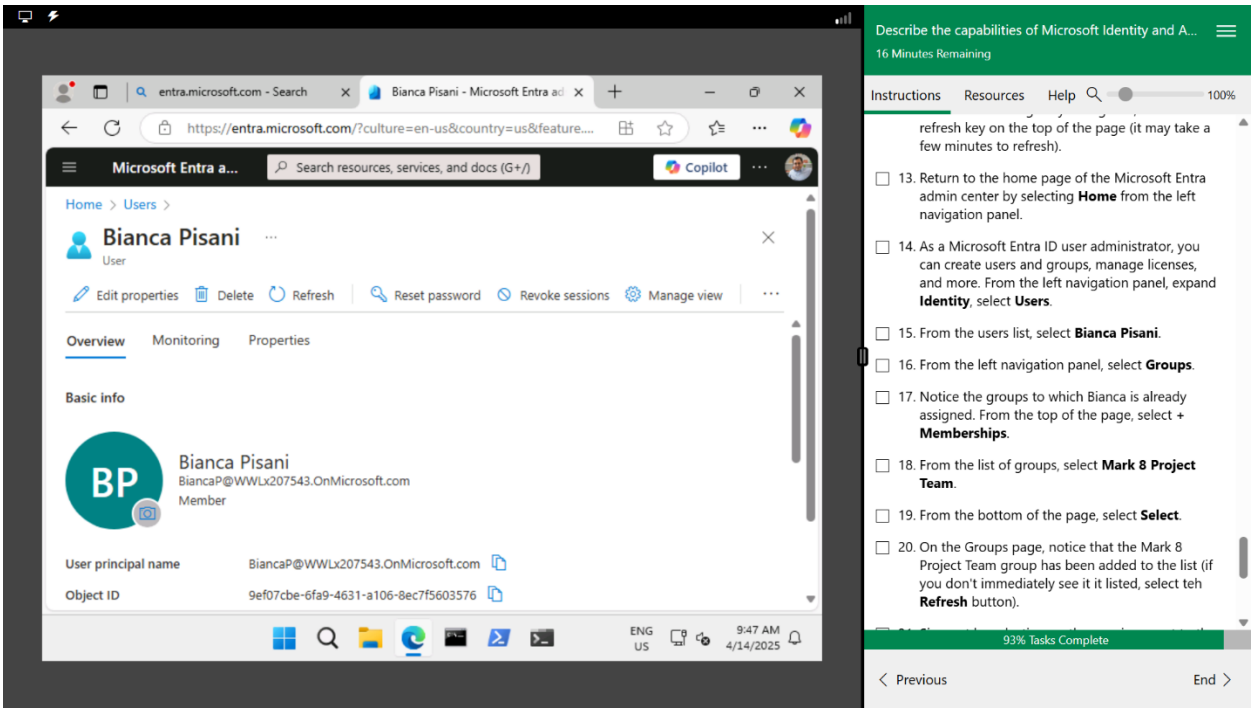
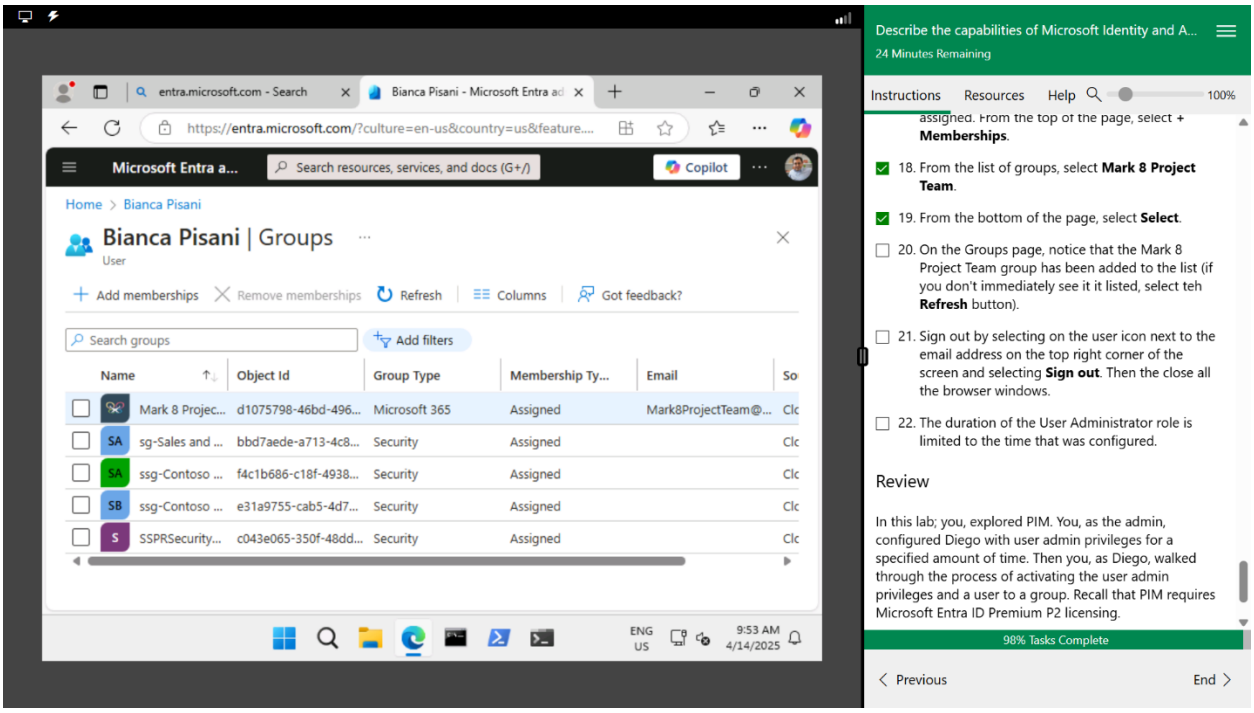
I concluded this lab by logging into and out of a profile titled “Bianca Pisani. I also got to assign her a new membership titled “Mark 8 Project Team”.

Here are the screenshots:





CONCLUSION

It took me three attempts to complete this lab activity; my first attempt was during class and the other two were personal. Considering this is a new concept to me, I am quite proud of what I achieved. Now that I'm familiar with the platform I'm sure the next lab will be a bit smoother.

I got to witness the practical aspect of the capabilities described in my resources; it serves me better to apply the aspects I spend my time learning about.
